KNX Binary Input 16-channel, 8 SU MDRC, Inputs 230 V AC

Product description:

The MDT Binary Input BE, converts, as an example, conventional push-buttons, switches and auxiliary contacts to 'smart' for KNX. The comprehensive application provides the appropriate parameters for different applications. 230 V AC version.

Product functions:

- To connect **Push-buttons, switches, window contacts**
- **Multitouch-function, sends up to 4 values on the same or different objects**
- **Innovative group control with long/extra long button press**
- **4 integrated logic modules**, e.g., to evaluate the inputs (closed window or send a second object)
- NO- and NC operation, contact status send
- Dimmer- and shutter function for singular- and double Push-button operation
- Sending of values, forced operation
- Scenes and blocking object for each channel
- Short/Long button press with 2 objects
- Cyclic sending, sending after reset
- 3 year warranty
